

Ohmni[®] Robot for Healthcare

RESOURCE GUIDE

Our telepresence robots provide accessible technology for hospitalized children, supporting their education, socialization, and emotional well-being. There are several ways in which children's hospitals use Ohmni robots to boost patient engagement and access. Below are some use cases that customers have shared that may help you augment your use.

KIDS DRIVE OHMNI ROBOT

Some hospitals have closed-circuit TV. Kids drive Ohmni down to the studio to participate in any ongoing programming.

Use Ohmni to go pick out a gift during a holiday event.

Set up a scavenger hunt or obstacle course where kids have to cruise through a space with Ohmni.

Alternative uses have been seen where Ohmni has been used in parallel with dog therapy! Kids take dogs on a walk using Ohmni.

Just for fun, let kids use the robot to venture out of their room and explore their nearby surroundings through the robot's driving controls.

Check out this blog post featuring Phoenix Children's Hospital for photos and more ideas of ways to use Ohmni in the Zone.

Parents, sibling, grandparents

- Visit their newborn sister, brother, grandchild in the NICU.
- Grant access to visitors while maintaining a safe distance.

Celebrities or special guests

- They can call into the robot to interact with the kids. Sports figures can dial-in and have robots be dressed in their jerseys.
- Magicians or caricature artists have dialed into Ohmni to teach kids how to do magic tricks or to create a new piece of art.
- Some schools allow speakers and other teachers to dial in.

INCREASED MEDICAL ACCESS

Doctors at Azria Health use Ohmni Robot to visit remotely and interact directly with their patients.

Ohmni is left in the hospital and called into by doctors to **help diagnose visually** recognizable conditions like a stroke. Being able to diagnose the patients remotely reduces the time it would take to start potentially life-saving procedures at any time of the day.

Ohmni has been used at a skilled nursing facility to allow medical staff to observe all the patients every day.

Similarly, medical consultants who do not need physical access to their patients have been able to do virtual check-ins and remotely treat patients without needing PPE.

TAKE OHMNI ON FIELD TRIPS

The Child Life and Arts Therapy Department of The Mount Kravis Children's Hospital uses Ohmni to let patients walk their therapy dogs.

Hospitals are pushing the boundaries in the most amazing ways by taking Ohmni on the road to many destinations. These hospitals have used Ohmni to let patients attend a picnics, meet the firefighters at the local station, visit museums and even walk therapy dogs.

Ohmni can go virtually anywhere and meet with anyone. Where will your Ohmni go?
